ALLETE First Quarter 2002 Form 10-Q

SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, we are hereby filing cautionary statements identifying important factors that could cause our actual results to differ materially from those projected in forward-looking statements (as such term is defined in the Private Securities Litigation Reform Act of 1995) made by or on behalf of ALLETE in this Quarterly Report on Form 10-Q, in presentations, in response to questions or otherwise. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases such as "anticipates," "believes," "estimates," "expects," "intends," "plans," "projects," "will likely result," "will continue" or similar expressions) are not statements of historical facts and may be forward-looking.

Forward-looking statements involve estimates, assumptions, risks and uncertainties and are qualified in their entirety by reference to, and are accompanied by, the following important factors, which are difficult to predict, contain uncertainties, are beyond the control of ALLETE and may cause actual results or outcomes to differ materially from those contained in forward-looking statements:

- war and acts of terrorism;
- prevailing governmental policies and regulatory actions, including those of the United States Congress, state legislatures, the FERC, the MPUC, the FPSC, the NCUC, the PSCW and various county regulators, about allowed rates of return, financings, industry and rate structure, acquisition and disposal of assets and facilities, operation and construction of plant facilities, recovery of purchased power and capital investments, and present or prospective wholesale and retail competition (including but not limited to transmission costs) as well as general vehicle-related laws, including vehicle brokerage and auction laws;
- unanticipated impacts of restructuring initiatives in the electric industry;
- economic and geographic factors, including political and economic risks;
- changes in and compliance with environmental and safety laws and policies;
- weather conditions;
- population growth rates and demographic patterns;
- the effects of competition, including the competition for retail and wholesale customers, as well as suppliers and purchasers of vehicles;
- pricing and transportation of commodities;
- market demand, including structural market changes;
- changes in tax rates or policies or in rates of inflation;
- unanticipated project delays or changes in project costs;
- unanticipated changes in operating expenses and capital expenditures;
- capital market conditions;
- competition for economic expansion or development opportunities;
- our ability to manage expansion and integrate recent acquisitions; and
- legal and administrative proceedings (whether civil or criminal) and settlements that affect the business and profitability of ALLETE.

Any forward-looking statement speaks only as of the date on which such statement is made, and ALLETE undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which that statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time and it is not possible for management to predict all of these factors, nor can it assess the impact of each of these factors on the businesses of ALLETE or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement.

ALLETE First Quarter 2002 Form 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The accompanying unaudited consolidated financial statements and notes should be read in conjunction with our 2001 Form 10-K. In our opinion all adjustments necessary for a fair statement of the results for the interim periods have been included. The results of operations for an interim period may not give a true indication of results for the year. The financial information for prior periods has been reclassified to reflect the discontinuance of our Water Services businesses, our auto transport business-Great Rigs, and our retail business-Electric Odyssey.

 (\$343.9 million in 2001); and \$15.7 million of capital expenditures in 2002
 (\$6.9 million in 2001).
Included \$34.3 million of Canadian operating revenue in 2002 (\$34.8 million in 2001).
Included \$222.4 million of Canadian assets in 2002 (\$227.2 million in 2001).

ALLETE First Quarter 2002 Form 10-Q

NOTE 2. DISCONTINUED OPERATIONS

In September 2001 we began a process of systematically evaluating our businesses to determine the strategic value of our assets and explore ways to unlock that value. As a result, our management and Board of Directors have committed to a plan to sell our Water Services businesses and our auto transport business. Water Services includes water and wastewater services operated by several wholly owned subsidiaries in Florida, North Carolina and Georgia. We anticipate selling our Water Services businesses before the end of 2002. During the first quarter of 2002 we exited our nonregulated water subsidiaries. We expect to exit the auto transport business during the second quarter 2002. We will continue to incur operating losses until we sell those assets. We have also completely exited the Electric Odyssey, our retail business. The financial results for all of these businesses have been accounted for as discontinued operations. In accordance with SFAS 144, we ceased depreciation of assets related to these businesses in the fourth quarter of 2001.

NOTE 4. TOTAL COMPREHENSIVE INCOME

For the quarter ended March 31, 2002 total comprehensive income was \$33.2 million (\$26.4 million for the quarter ended March 31, 2001). Total comprehensive income includes net income, unrealized gains and losses on securities classified as available-for-sale, changes in the fair value of an interest rate swap and foreign currency translation adjustments.

NOTE 5. GOODWILL AND OTHER INTANGIBLE ASSETS

We adopted SFAS 142, "Goodwill and Other Intangible Assets," in January 2002 and accordingly no longer amortize goodwill. We completed the required goodwill impairment testing in the first quarter of 2002 and no goodwill is impaired at this time. SFAS 142 requires disclosure of what reported net income and earnings per share would have been in all periods presented exclusive of amortization expense recognized in those periods related to goodwill or other intangible assets that are no longer being amortized. All goodwill amortization related to continuing operations.

Adjusted	\$0.44	\$0.50

NOTE 6. NEW ACCOUNTING STANDARDS

SFAS 143, "Accounting for Asset Retirement Obligations," requires the recognition of a liability for an asset retirement obligation in the period in which it is incurred. When the liability is initially recorded, the carrying amount of the related long-lived asset is correspondingly increased. Over time, the liability is accreted to its present value and the related capitalized charge is depreciated over the useful life of the asset. SFAS 143 is effective for fiscal years beginning after June 15, 2002. Currently, decommissioning amounts collected in Minnesota Power's rates are reported in accumulated depreciation. We are reviewing what additional assets, if any, may have associated retirement costs as defined by SFAS 143.

NOTE 7. SQUARE BUTTE POWER PURCHASED CONTRACT

Minnesota Power has a power purchase agreement with Square Butte that extends through 2026 (Agreement). It provides a long-term supply of low-cost energy to customers in our electric service territory and enables Minnesota Power to meet power pool reserve requirements. Square Butte, a North Dakota cooperative corporation, owns a 455-MW coal-fired generating unit (Unit) near Center, North Dakota. The Unit is adjacent to a generating unit owned by Minnkota Power Cooperative, Inc. (Minnkota), a North Dakota cooperative corporation whose Class A members are also members of Square Butte. Minnkota serves as the operator of the Unit and also purchases power from Square Butte.

Minnesota Power is entitled to approximately 71 percent of the Unit's output under the Agreement. After 2005 and upon compliance with a two-year advance notice requirement, Minnkota has the option to reduce Minnesota Power's entitlement by 5 percent annually, to a minimum of 50 percent. Minnesota Power is obligated to pay its pro rata share of Square Butte's costs based on Minnesota Power's entitlement to Unit output. Minnesota Power's payment obligation is suspended if Square Butte fails to deliver any power, whether produced or purchased, for a period of one year. Square Butte's fixed costs consist primarily of debt service. At March 31, 2002 Square Butte had total debt outstanding of \$299.1 million. Total annual debt service for Square Butte is expected to be approximately \$36 million in each of the years 2002 and 2003, and \$23 million in each of the years 2004 through 2006. Variable operating costs include the price of coal purchased from BNI Coal, Ltd., our subsidiary, under a long-term contract. Minnesota Power's payments to Square Butte are approved as purchased power expense for ratemaking purposes by both the MPUC and FERC.

ALLETE First Quarter 2002 Form 10-Q

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

ALLETE has core operations that are focused on two business segments. ENERGY SERVICES includes electric and gas services, coal mining and telecommunications. AUTOMOTIVE SERVICES includes a network of wholesale and total loss vehicle auctions, a finance company, a vehicle remarketing company, a company that provides vehicle inspection services to the automotive industry and its lenders, and a company that provides Internet-based automotive parts location and insurance claim audit services nationwide. INVESTMENTS AND CORPORATE CHARGES provide corporate liquidity and include our real estate operations, investments in emerging technologies related to the electric utility industry, our securities portfolio and corporate charges. Corporate charges represent general corporate expenses, including interest, not specifically related to any one business segment. DISCONTINUED OPERATIONS includes our Water Services businesses, our auto transport business-Great Rigs, and our retail business-Electric Odyssey.

CONSOLIDATED OVERVIEW

For the quarter ended March 31, 2002, net income was up 7 percent and earnings per share were down 4 percent over the same period of 2001. Excluding \$2.3 million, or \$0.02 per share, of charges related to our exit from non-strategic businesses, earnings per share for the quarter ended March 31, 2002 would have been \$0.46. Earnings for 2001 included \$2.8 million, or \$0.04 per share, of goodwill amortization expense. The issuance of 6.6 million shares of our common stock in the second quarter of 2001 also impacted earnings per share for 2002.

	\$0.44	\$0.46

NET INCOME

ENERGY SERVICES' net income in 2002 decreased \$3.3 million, or 27 percent, primarily due to weaker wholesale market conditions. Last year's stronger economy and colder winter weather resulted in higher wholesale prices. Total retail megawatthour sales were similar to last year.

AUTOMOTIVE SERVICES reported a \$6.6 million, or 36 percent, increase in net income and a 6 percent increase in EBITDAL over 2001. The continued growth in net income was primarily due to higher conversion rates, improved cost efficiencies, a mandated accounting change related to goodwill amortization and lower interest rates. The conversion rate (the percentage of vehicles sold from those that were offered at auction) related to wholesale vehicles sold was 66 percent for the quarter ended March 31, 2002 (64 percent for the same period in 2001). In 2002 vehicles sold at our wholesale auction facilities were similar to last year. Fleet downsizing by rental car companies after September 11, 2001 resulted in increased sales of factory vehicles at our auction facilities during the fourth quarter of 2001 to the detriment of the first quarter of 2002. Vehicle sales in other higher margin categories had strong conversion rates in 2002 and helped mitigate the reduction in sales of factory vehicles. Vehicles sold at our total loss vehicle auction facilities were up 37 percent from 2001. AFC contributed 30 percent of the net income for Automotive Services in 2002 (36 percent in 2001) and reported a 7 percent increase in the number of vehicles financed.

INVESTMENTS AND CORPORATE CHARGES reported lower net income in 2002 due in part to lower returns on our securities portfolio. Our securities portfolio earned an after-tax annualized return of 3.08 percent in 2002 (10.32 percent in 2001). This decrease was partially offset by larger real estate sales and more income from our emerging technology investments.

DISCONTINUED OPERATIONS was down \$0.4 million reflecting \$2.3 million of exit charges associated with Great Rigs and the Electric Odyssey. This decrease was partially offset by a \$1.8 million increase in net income from our Water Services businesses primarily due to the suspension of depreciation.

COMPARISON OF THE QUARTERS ENDED MARCH 31, 2002 AND 2001

ENERGY SERVICES

OPERATING REVENUE was down \$16.1 million, or 10 percent, in 2002. Revenue from wholesale power marketing and trading activities decreased \$11.3 million primarily due to weak wholesale market conditions as a result of warmer winter weather in 2002. Revenue from retail electric and gas sales was down \$10.9 million in 2002 reflecting warmer winter weather, lower fuel clause recoveries and lower industrial revenue. Total retail megawatthour sales were similar to last year. These 2002 decreases were partially offset by \$4.6 million more revenue from Enventis Telecom reflecting the July 2001 acquisition of Enventis, Inc.

Revenue from electric sales to taconite customers accounted for 10 percent of consolidated operating revenue in both 2002 and 2001. Electric sales to paper and pulp mills accounted for 4 percent of consolidated operating revenue in both 2002 and 2001. Sales to other power suppliers accounted for 4 percent of consolidated operating revenue in 2002 (7 percent in 2001).

OPERATING EXPENSES were down \$10.6 million, or 8 percent, in 2002. Purchased power expense was down \$14.4 million in 2002 because Company generation was up 10 percent and 7 percent fewer megawatthours were sold. Purchased gas expense was lower in 2002 because in 2001 prices paid were at record highs. These decreases were partially offset by the inclusion of Enventis, Inc. operations.

ALLETE First Quarter 2002 Form 10-Q

AUTOMOTIVE SERVICES

OPERATING REVENUE was up \$8.6 million, or 4 percent, in 2002 reflecting strong conversion rates at wholesale auction facilities. At ADESA, 461,000 wholesale vehicles were sold in 2002 (465,000 in 2001). Vehicles sold were impacted by a reduction in factory vehicles brought to auction. Stronger sales in other vehicle categories helped mitigate the reduction in factory vehicles. In addition, at our total loss vehicle auctions 48,000 vehicles were sold in 2002 (35,000 in 2001), an increase of 37 percent.

Operating revenue from AFC was higher in 2002 reflecting a 7 percent increase in vehicles financed through its loan production offices. AFC financed approximately 237,000 vehicles in 2002 (221,000 in 2001) and managed total receivables of \$500 million at March 31, 2002 (\$497 million at March 31, 2001).

OPERATING EXPENSES were down \$1.5 million, or 1 percent, in 2002 primarily due to the discontinuance of goodwill amortization (\$3.3 million), reduced interest expense (\$4.9 million) as a result of lower interest rates and improved cost efficiencies. These decreases were partially offset by an increase in operating expenses incurred to standardize operations at all our total loss auction facilities and expenditures for information technology initiatives. Also, operating expenses in 2001 reflected additional expenses for utility and labor costs incurred as a result of inclement weather conditions.

INVESTMENTS AND CORPORATE CHARGES

OPERATING REVENUE was up \$3.6 million, or 28 percent, in 2002 due to the timing of sales related to our real estate operations and our emerging technology investments. Two large real estate sales in 2002 contributed \$4.9 million to revenue, while in 2001 two large real estate sales contributed \$2.6 million to revenue. Operating revenue included \$3.3 million of gains on the sale of certain emerging technology investments in 2002. These increases were partially offset by less income from the securities portfolio due to lower returns in 2002.

OPERATING EXPENSES were up \$4.2 million, or 33 percent, in 2002 primarily due to larger real estate sales and additional interest expense.

CRITICAL ACCOUNTING POLICIES

Certain accounting measurements under applicable generally accepted accounting principles involve management's judgment about subjective factors and estimates, the effects of which are inherently uncertain. The following summarizes those accounting measurements we believe are most critical to our reported results of operations and financial condition.

ACCOUNTING POLICY	JUDGMENTS/UNCERTAINTIES AFFECTING APPLICATION	SEE ADDITIONAL DISCUSSION AT	
Uncollectible Receivables and Allowance for Doubtful Accounts	 Economic conditions affecting customers, suppliers and market prices Outcome of negotiations, litigation and bankruptcy proceedings Current sales, payment and write-off histories 	Liquidity and Capital Resources - Working Capital on page 14	
Goodwill Impairment	 Economic conditions affecting market valuations Changes in business strategy Forecast of future operating cash flows and earnings 	Note 6. Goodwill and Intangible Assets on page 9	

ALLETE First Quarter 2002 Form 10-Q

OUTLOOK

We continue to expect earnings per share will be in the range of \$2.13 to \$2.17 for 2002, excluding any gain from the expected sale of our Water Services assets. This 14 percent to 16 percent increase in earnings per share for 2002 incorporates the goodwill accounting change. The cash generated from our operating results and the expected sale of our Water Services assets will fuel our future growth. We will focus on our two core competencies-Energy Services and Automotive Services, and work toward positioning each of them to continue our earnings growth track record.

ENERGY SERVICES. Our new merchant generation facilities at Taconite Harbor Energy Center in northern Minnesota, and Kendall County near Chicago, Illinois, are expected to be fully operational by the second quarter of 2002.

AUTOMOTIVE SERVICES. We expect to see continued EBITDAL and revenue improvement from our auctions acquired since January 2000. In addition, we anticipate continued growth in the number of vehicles sold and financed at auction. As previously disclosed, we expect 30 percent earnings growth over 2001 for Automotive Services-including the goodwill accounting change. We also expect a 5 percent increase in total vehicles sold and a 13 percent increase in vehicles financed over 2001. This quarter we acquired a large total loss vehicle auction facility and have made progress on integrating total loss vehicle auctions into some of our wholesale auction facilities.

INVESTMENTS AND CORPORATE CHARGES. We continue to anticipate net income from Investments and Corporate Charges to remain stable in 2002. An expected lower contribution from our real estate operations should be offset by better returns from our emerging technology investments and securities portfolio, and lower corporate charges.

DISCONTINUED OPERATIONS. Negotiations for the sale of our auto transport business are still in progress and we expect to completely exit that business during the second quarter of 2002. We will continue to incur operating losses until we sell the assets.

LIQUIDITY AND CAPITAL RESOURCES

CASH FLOW ACTIVITIES

During the first quarter of 2002 cash flow from operations reflected strong operating results and continued focus on working capital management. Cash flow from operations was higher in 2002 due to the timing of the collection of certain finance receivables outstanding at December 31, 2001. Cash flow from operations was also affected by a number of factors representative of normal operations.

WORKING CAPITAL. Additional working capital, if and when needed, generally is provided by the sale of commercial paper. Our securities investments can be liquidated to provide funds for reinvestment in existing businesses or acquisition of new businesses. Approximately 5.1 million original issue shares of our common stock are available for issuance through INVEST DIRECT, our direct stock purchase and dividend reinvestment plan.

A substantial amount of ADESA's working capital is generated internally from payments for services provided. However, ADESA has arrangements to use proceeds from the sale of commercial paper issued by ALLETE to meet short-term working capital requirements arising from the timing of payment obligations to vehicle sellers and the availability of funds from vehicle purchasers. During the sales process, ADESA does not typically take title to vehicles.

AFC offers short-term on-site financing for dealers to purchase vehicles at auctions in exchange for a security interest in those vehicles. The financing is provided through the earlier of the date the dealer sells the vehicle or a general borrowing term of 30 to 45 days. AFC has arrangements to use proceeds from the sale of commercial paper issued by ALLETE to meet its operational requirements.

At March 31, 2002 approximately 91 percent of AFC's finance receivables were securitized (81 percent at December 31, 2001). AFC sells certain finance receivables on a revolving basis to a wholly owned, unconsolidated, qualified special purpose subsidiary. This subsidiary in turn sells, on a revolving basis, an undivided interest in eligible finance receivables, up to a maximum at any one time outstanding of \$325 million, to third party purchasers under an agreement that expires at the end of 2002. At March 31, 2002 AFC had sold \$437.8 million of finance receivables to the special purpose subsidiary (\$381.2 million at December 31, 2001). Third party purchasers had purchased an undivided interest in finance receivables of \$307.0 million from this subsidiary at March 31, 2002 (\$267.0 million at December 31, 2001). Unsold finance receivables held by the special purpose subsidiary are recorded by AFC as residual interest at fair value. Fair value is based upon estimates of future cash flows, using assumptions that market participants would use to value such instruments, including estimates of anticipated credit losses over the life of the receivables sold without application of a discount rate due to the short-term nature of the receivables sold. The fair value of AFC's residual interest was \$118.3 million at March 31, 2002 (\$103.0 million at December 31, 2001). Proceeds from the sale of the receivables were used to repay borrowings from ALLETE and fund vehicle inventory purchases for AFC's customers. AFC must maintain certain financial covenants such as minimum tangible net worth to comply with the terms of the securitization agreement.

Significant changes in accounts receivable and accounts payable balances at March 31, 2002 compared to December 31, 2001 were due to increased sales and financing activity at Automotive Services. Typically auction volumes are down during the winter months and in December because of the holidays. As a result, ADESA had higher receivables and higher payables at March 31, 2002.

We provide up to \$50 million in credit support to facilitate the power marketing and trading activities of Split Rock Energy, and had \$30.3 million in outstanding support at March 31, 2002 (\$36.0 million at December 31, 2001).

SECURITIES. In March 2001 ALLETE, ALLETE Capital II and ALLETE Capital III, jointly filed a registration statement with the SEC pursuant to Rule 415 under the Securities Act of 1933. The registration statement, which has been declared effective by the SEC, relates to the possible issuance of an aggregate amount of \$500 million of securities which may include ALLETE common stock, first mortgage bonds and other debt securities, and ALLETE Capital II and ALLETE Capital III preferred trust securities, of which approximately \$387 million remains available to be issued. ALLETE also previously filed a registration statement, which has been declared effective by the SEC, relating to the possible issuance of \$25 million of first mortgage bonds and other debt securities. We may sell all or a portion of the remaining registered securities if warranted by market conditions and our capital requirements. Any offer and sale of the above mentioned securities will be made only by means of a prospectus meeting the requirements of the Securities Act of 1933 and the rules and regulations thereunder.

INVESTMENTS. As companies included in our emerging technology investments are sold, we will recognize a gain or loss. Our investment in the companies that have gone public had a cost basis of approximately \$12 million at March 31, 2002 and December 31, 2001. The aggregate market value of our investment in these companies at March 31, 2002 was \$15 million (\$24 million at December 31, 2001). These investments provide us with access to developing technologies before their commercial debut, as well as potential financial returns and diversification opportunities. We view these investments as a source of capital for redeployment in existing businesses.

ALLETE First Quarter 2002 Form 10-Q

CAPITAL REQUIREMENTS

Consolidated capital expenditures for the quarter ended March 31, 2002 totaled \$46.9 million (\$24.6 million in 2001). Expenditures for 2002 included \$20.6 million for Energy Services and \$10.6 million for Automotive Services. Expenditures for 2002 also included \$15.7 million related to discontinued operations (\$11.8 million to maintain our Water Services businesses while they are in the process of being sold; \$3.9 million to buy previously leased auto transportation trucks). Internally generated funds were the primary sources of funding for these expenditures.

NEW ACCOUNTING STANDARDS

SFAS 143, "Accounting for Asset Retirement Obligations," requires the recognition of a liability for an asset retirement obligation in the period in which it is incurred. When the liability is initially recorded, the carrying amount of the related long-lived asset is correspondingly increased. Over time, the liability is accreted to its present value and the related capitalized charge is depreciated over the useful life of the asset. SFAS 143 is effective for fiscal years beginning after June 15, 2002. Currently, decommissioning amounts collected in Minnesota Power's rates are reported in accumulated depreciation. We are reviewing what additional assets, if any, may have associated retirement costs as defined by SFAS 143.

READERS ARE CAUTIONED THAT FORWARD-LOOKING STATEMENTS INCLUDING THOSE CONTAINED ABOVE, SHOULD BE READ IN CONJUNCTION WITH OUR DISCLOSURES UNDER THE HEADING: "SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995" LOCATED ON PAGE 3 OF THIS FORM 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

SECURITIES PORTFOLIO

Our securities portfolio has exposure to both price and interest rate risk. Investments held principally for near-term sale are classified as trading securities and recorded at fair value. Trading securities consist primarily of the common stock of publicly traded companies. In strategies designed to hedge overall market risks, we also sell common stock short. Investments held for an indefinite period of time are classified as available-for-sale securities and also recorded at fair value. At March 31, 2002 available-for-sale securities consisted of the common stock of publicly traded companies and equity securities in a grantor trust established to fund certain employee benefits.

FAIR VALUE	MARCH 31, 2002	DECEMBER 31, 2001
Millions		
Trading Securities Portfolio	\$165.9	\$155.6
Available-For-Sale Securities Portfolio	\$28.4	\$26.5

FOREIGN CURRENCY

Our foreign currency exposure is limited to the conversion of operating results of our Canadian subsidiaries and, therefore, we have not entered into any foreign exchange contracts to hedge the conversion of our Canadian operating results into United States dollars.

POWER MARKETING AND TRADING

Minnesota Power purchases power for retail sales in our retail service territory and occasionally sells excess generation in the wholesale market. The services of Split Rock Energy are used to fulfill purchase requirements for retail load and market excess generation.

By the second quarter of 2002 we expect to have up to 500 MW of merchant generation (non-rate base generation sold at market-based rates pursuant to FERC authority) available for sale to the wholesale market. This includes 225 MW of generation at our Taconite Harbor Energy Center in northern Minnesota that was acquired in October 2001. Also included are 275 MW of generation secured through a 15-year tolling agreement, which commenced in May 2002, with NRG Energy at a facility near Chicago, Illinois. Under the tolling agreement, the Company pays a fixed capacity charge for the right, but not the obligation, to utilize one 275 MW generating unit. We are responsible for arranging the natural gas fuel supply and are entitled to the electricity produced.

Our strategy is to sell the majority of merchant generation through long-term contracts of various durations. The balance will be sold in the spot market, through short-term agreements, or possibly utilized as a source of low-cost supply for our regulated operations if the need exists. The services of Split Rock Energy may be utilized to broker or market merchant generation. We currently have two long-term forward capacity and energy contracts related to generation secured by the NRG Energy tolling agreement. Each is for 50 MW, with one having a 10-year term and the other a 15-year term.

We own 50 percent of Split Rock Energy which was formed in 2000 with Great River Energy to combine power supply assets and customer loads for power marketing and trading, power-pool operations and generation outage protection. Split Rock Energy operates in the wholesale energy markets, and engages in trading activities by entering into forward and option contracts for the purchase and sale of electricity. These contracts are generally short-term in nature with maturities of less than one year. Although Split Rock Energy generally attempts to balance its purchase and sale positions, commodity price risk sometimes exists or is created. This risk is actively managed through a risk management program that includes policies, procedures and limits established by the Split Rock Energy Board of Governors. Split Rock Energy's open trading contracts were not significant at March 31, 2002 and had a fair value of \$49,000.

PART II. OTHER INFORMATION

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On May 14, 2002 shareholders of ALLETE will vote on the election of 11 directors, and approval of the appointment of PricewaterhouseCoopers LLP as our independent accountants for 2002 and the reservation of an additional three million shares of ALLETE common stock for issuance under the Executive Long-Term Incentive Compensation Plan. Voting results will be provided in our Form 10-Q for the quarter ended June 30, 2002.

On April 11, 2002 the MPUC approved Minnesota Power's request to acquire the 225-MW Taconite Harbor Energy Center from Rainy River Energy Corporation-Taconite Harbor, a wholly owned subsidiary of the Company. The merger into Minnesota Power is expected to be complete by the middle of May 2002.

Activities related to staffing and restarting of the three generating units at Taconite Harbor were initiated during November 2001. On February 4, 2002 Unit 2 became operational. Unit 3 became operational on April 1, 2002. Unit 1 is scheduled to begin operating in late May 2002.

As required by statute, the Florida Governmental Utilities Authority (FGUA) convened a public hearing on May 2, 2002 to obtain input on the FGUA's proposed acquisition of the assets of Florida Water. Due to concerns raised by local governmental units representing areas served by Florida Water, the FGUA will reconvene the public hearing on May 16, 2002, and has advised Florida Water that it will work with these local governments through June 2002 in an effort to obtain their support. It is then the FGUA's intent to advise Florida Water which utility systems it desires to purchase and seek to finalize definitive agreements. Certain local governmental units have indicated an interest in buying utility systems directly from Florida Water. Although the period for exclusive dealing with the FGUA will lapse on May 14, 2002, Florida Water expects to continue its cooperation with FGUA due diligence efforts.

On March 18, 2002 Potlatch Corporation (Potlatch) announced the sale of its Cloquet pulp and paper mill to South Africa-based Sappi Ltd. (Sappi). The sale is subject to customary closing conditions, including regulatory approvals, and is expected to be completed in the second quarter of 2002. Minnesota Power will continue to serve the Cloquet facility after the sale. Negotiations are underway between Potlatch, Sappi and Minnesota Power to disaggregate the current Potlatch Electric Service Agreement that provides Potlatch a combined bill for electric usage at its Cloquet, Brainerd and Grand Rapids facilities.

In conjunction with the sale of the Cloquet mill, Potlatch will close its Brainerd paper mill. Potlatch is looking for another operator for the Brainerd plant, which can no longer be used to produce coated paper, which would compete with the Cloquet mill. Potlatch's Grand Rapids strandboard plant will continue to operate and be served by Minnesota Power.

National Steel Corporation (National) filed for Chapter 11 bankruptcy protection on March 6, 2002 leaving Minnesota Power with approximately \$800,000 of unpaid pre-petition debt for electric service to the plant in Keewatin, Minnesota. Minnesota Power reserved \$800,000 in March 2002 for this account and has arranged assurance of adequate protection for future payments due from National during the bankruptcy period.

ALLETE First Quarter 2002 Form 10-Q

10 Fifth Amendment to Receivables Purchase Agreement, dated as of February 28, 2002, among AFC Funding Corporation, as Seller; Automotive Finance Corporation, as Servicer; Fairway Finance Corporation, as Purchaser; and BMO Nesbitt Burns Corp., as Agent.

[AFC Funding Corporation]

FIFTH AMENDMENT TO RECEIVABLES PURCHASE AGREEMENT

This FIFTH AMENDMENT (this "AMENDMENT"), dated as of February 28, 2002, is among AFC FUNDING CORPORATION, an Indiana corporation (the "SELLER"), AUTOMOTIVE FINANCE CORPORATION, an Indiana corporation (the "SERVICER"), FAIRWAY FINANCE CORPORATION, a Delaware Corporation (the "PURCHASER"), and BMO NESBITT BURNS CORP., a Delaware Corporation, as Agent for Purchaser (in such capacity, the "AGENT").

RECITALS

1. The Seller, the Servicer, the Purchaser and the Agent are parties to the Receivables Purchase Agreement, dated as of December 31, 1996 (as amended through the date hereof, the "AGREEMENT").

2. The Seller, the Servicer, the Purchaser, and the Agent desire to amend the Agreement as hereinafter set forth.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

SECTION 1. AMENDMENT TO THE AGREEMENT. The Agreement is hereby amended as follows:

1.1 The definition of "Purchase Limit" in EXHIBIT I to the Agreement is hereby amended by substituting "\$325,000,000" for "\$300,000,000" where the latter appears in that definition.

SECTION 2. CONDITIONS TO EFFECTIVENESS.

2.1 This Amendment shall become effective on the date hereof upon receipt by the Agent of the following, each duly executed and dated as of the date hereof (or such other date satisfactory to the Agent), in form and substance satisfactory to the Agent:

(a) counterparts of this Amendment (whether by facsimile or otherwise) executed by each of the parties hereto;

(b) counterparts of the 2nd Amendment to the Amended and Restated Liquidity Asset Purchase Agreement (whether by facsimile or otherwise) executed by each of the parties thereto;

(c) a written statement from Moody's Investors Service, Inc. and Standard & Poor's that this Amendment will not result in a downgrade or withdrawal of the rating of the Notes; and

 $\ensuremath{\left(d \right)}$ such other documents and instruments as the Agent may reasonably request.

SECTION 3. EFFECT OF AMENDMENT; RATIFICATION. Except as specifically amended hereby, the Agreement is hereby ratified and confirmed in all respects, and all of its provisions shall remain in full force and effect. After this Amendment becomes effective, all references in the Agreement (or in any other Transaction Document) to "the Receivables Purchase Agreement", "this Agreement", "hereof", "herein", or words of similar effect, in each case referring to the Agreement, shall be deemed to be references to the Agreement as amended hereby. This Amendment shall not be deemed to expressly or impliedly waive, amend, or supplement any provision of the Agreement other than as specifically set forth herein.

SECTION 4. COUNTERPARTS. This Amendment may be executed in any number of counterparts and by different parties on separate counterparts, and each counterpart shall be deemed to be an original, and all such counterparts shall together constitute but one and the same instrument.

SECTION 5. GOVERNING LAW. This Amendment shall be governed by, and construed in accordance with, the internal laws of the State of Indiana without regard to any otherwise applicable conflict of laws principles.

SECTION 6. SECTION HEADINGS. The various headings of this Amendment are inserted for convenience only and shall not affect the meaning or interpretation of this Amendment or the Agreement or any provision hereof or thereof.
